DETAILED ACTION

Drawings

1. The drawings are objected to because amended figures 16 and 17 are not labeled as "Amended" (see 37 CFR 1.173(b)(3)). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. Examiner here notes that per 37 CFR 1.173, the specification is to be provided in double column format. The specification submitted originally was in single column format, and the subsequent amendments refer to that single column format.

Art Unit: 3731

3. Examiner suggests applicant submit a complete specification in double column format that includes ALL of the amendments made to the specification subsequent to the issuance of the original patent (5,855,598). All of those amendments should be shown using the markings outlined in 37 CFR 1.173 (i.e. additions to the specification shown by underlining, and deletions from the specification shown within single brackets; noting that striking through deleted subject matter does *not* conform to the requirements of 37 CFR 1.173).

4. Examiner further points out that because amendments made by Certificate of Correction in the original patent are considered to be a part of the original patent, those amendments do not need to be shown as added or deleted by underlining or enclosure in single brackets. Those amendments should, however, be shown as part of the text of the specification.

Allowable Subject Matter

5. Claims 1-30, 40, 42 and 59 are allowed.

Response to Amendment

6. Should applicant have any questions or comments regarding this action, applicant is encouraged to contact the Examiner at the number below.

Conclusion

- 7. This application is in condition for allowance except for the formal matters outlined above.
- 8. Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).
